## Personal Overview

---

Having graduated from Lancaster University with a first-class MSci in Theoretical Physics with Mathematics, I am now a PhD student in the School of Physics and Astronomy at the University of St Andrews, working under the supervision of Dr Bernd Braunecker in the field of strongly correlated materials.

My work with Dr Braunecker is concerned with studying the joint-coherent dynamics of an impurity spin embedded within a strongly interacting environment, resulting from the onset of temporal correlations. These non-Markovian effects occur over sub-thermal timescales, and our work has been specifically focused on providing a description of how the free-induction decay amplitude of the impurity spin is shifted with the tuning of intra-bath interaction and applied magnetic field strengths. Having completed this study for the Luttinger liquid, we are now branching out to study more exotic systems.

## Publications

---

**Diagnostics of entanglement dynamics in noisy and disordered spin chains via the measurement-induced steady-state entanglement transition**

Phys. Rev. B 105, 144202 (2022)

## Teaching and Marking

---

Quantum Mechanics 1, Martinmas semester 2021

Lagrangian and Hamiltonian Dynamics, Candlemas semester 2022

## Conference Presentations

---

IOP Condensed Matter and Quantum Materials, 2021

My presentation: <https://youtu.be/tBsqLMA4f7Y?t=4115>

General Conference of the Condensed Matter Division of the European Physical Society (CMD29), 2022

## Organised Seminar Series

---

Quantum Information Scotland Network Seminars, 2020-2021

St Andrews Theory Discussion, 2022-

## Scottish Universities Physics Alliance Graduate School Modules

---

Modern Topics in Condensed Matter Theory, Martinmas semester 2020

Quantum Field Theory, Martinmas semester 2020

Software Carpentry, Candlemas semester 2022

## Education and Qualifications

---

The University of St Andrews

PhD Theoretical Physics, 2020-2024

Lancaster University

MSci Hons Theoretical Physics with Mathematics (1<sup>st</sup>), 2016-2020
